TECHNICAL SKILLS

- **Languages and Web Technologies:** HTML5, CSS3, JavaScript (ES6+), React.js, Redux, API Integration, React-Router, RESTful APIs, Plotly.js, jQuery, AJAX.
- **CSS Frameworks:** Bootstrap, React-Bootstrap, Material UI.
- **Development Tools:** Git, GitHub (Version Control System)

PROFESSIONAL EXPERIENCE

72 DRAGONS

Frontend Developer

Remote, India

March 2024 -Present

PROJECT: SOCIAL MEDIA TRACKING ONE PAGER DASHBOARD

HTML, CSS, JAVASCRIPT, PLOTLY.JS, AJAX

- Designed and delivered 20+ interactive one-pager dashboards for each team (e.g., Film, Health, Gallery, Arts, Article, Media, etc.) to track performance and social media follower gains/losses.
- Boosted reporting efficiency and decisions by integrating **Django variables** into interactive **Plotly visuals** (graphs and tables) and reduced manual reporting by 30+ hours/month with automated, reusable dashboards.
- Enhanced data clarity by implementing 15+ interactive popups triggered by graph/table clicks for detailed insights.
- Added next/previous navigation to 5+ multi-graph containers, enabling seamless graph switching and synchronized popups.
- Built a date selector that auto-updates the header's title date, graphs, and tables with team-specific data by selected date, with default view loading current date for real-time, team-specific insights—reducing manual reporting effort by 30%.
- Implemented dynamic date-range filtering with interactive graph updates, enabling real-time visualization based on user-selected date ranges. Integrated 5-second and 10-second interval toggle controls for seamless switching between time-based graph views.
- Utilized dropdown-based navigation for streamlined access, reducing navigation time by 30%.
- Improved user experience with a loading display, boosting satisfaction by 20%, by showing a progress indicator during slow server responses or delayed data retrieval.
- Developed a persistent YouTube-style graph mini-player with floating graph playback, Previous/Next navigation, expand/shrink functionality, edge auto-hide with instant restore, and localStorage-based state persistence, ensuring uninterrupted graph access across multiple dashboard pages.

PROJECT: SALES DASHBOARD

HTML, CSS, Bootstrap, JAVASCRIPT, PLOTLY.JS, AJAX

- Designed and developed a secure internal Sales Dashboard with interactive graphs for sales performance, client management, and contract tracking, implementing role-based authorization to restrict access to authorized company users.
- Integrated Django backend data into Plotly.js to visualize 1K+ sales and client records through interactive dashboards.
- Implemented a validated data entry form integrated with the Django backend to store records in the database and display them in a dynamic table with search, pagination, CSV export, and efficient data management capabilities.
- Created dynamic dropdown functionality that allows users to add new options (e.g., locations or services) from the frontend, with automatic database storage and real-time dropdown updates.
- Built a pre-submission confirmation dialog with review and edit functionality, allowing users to verify form data before it is stored in the database.

ESOLZ TECHNOLOGIES PVT. LTD

React.js Developer

Kolkata, West Bengal

November 2022 – May 2023

- Constructed and optimized the Admin Dashboard User Panel, enhancing UX with edit/delete buttons, modals, accordions, and draggable columns, cutting task time by 3 minutes per session.
- Revamped website navigation with React-Router that facilitated seamless page transitions across 5 different application sections; optimized code structure resulted in a smoother user experience and faster load times.
- **Pioneered React.js single-page applications**, designing and testing 5+ **RESTful APIs** to streamline back-end logic and data flow.

EDUCATION

- **Master of Computer Applications**, University of Engineering & Management, Kolkata – **CGPA: 9.41** (2019–2022)
- **Bachelor of Science** in Computer Science, St. Xavier's College, Burdwan – **69.71%** (2015–2018)

PROJECTS

YouTube Lite

React.js, Rapid API, Tailwind CSS

- Crafted a YouTube clone SPA, integrating Rapid API for live content with video playback and search, boosting engagement, and cutting load time by 3 seconds.

Food Recipe Finder App

React.js, Edamam API, Tailwind CSS, Axios

- Created React and front-end skills during a 6-month internship by building a Food Recipe Finder app and using Edamam API for real-time data, handling 100+ daily recipe searches.
